IMPORTANT DISCLOSURES
AND DESIGNATION OF SPECIAL BILLING INSTRUCTIONS

Disclosures:

All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from above specifications involving extra costs, will be executed only upon written orders, and will become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents or delays beyond our control. Any restitution for a lien will be at client's cost. This proposal subject to acceptance within thirty (30) days and is void thereafter.
According to Florida's Construction Lien Law (Sections 713.001 - 713.37, Florida Statutes), those who work on your property or provide materials and are not paid in full have a right to claim for payment against your property. This claim is known as a construction lien. If your contractor or a subcontractor fails to pay subcontractors, sub-subcontractors, or materials suppliers or neglects to make other legally required payments, the people who are owed money may look to your property for payment, even if you have paid your contractor in full. If you fail to pay your contractor, your contractor may also have a lien on your property. This means if a lien is filed your property could be sold against your will to pay for labor, materials, or other services that your contractor or a subcontractor may have failed to pay. Florida's construction lien law is complex and it is recommended that whenever a specific problem arises, you contact an attorney.

Permit Fees and Processing Costs:
Arrow Asphalt & Engineering, Inc. uses a professional and experienced firm to procure the required permits for work to be performed. The costs and fees associated with this service as well as any permit fees and costs are **in addition to** the amount listed on this proposal.
