CITY HALL

Chairman Schinder called the meeting to order at 8:30 AM.

1. Roll Call
   Barry Schinder - present
   Bruce Loucks – present
   Brad Sicari - present
   George Garba – present
   Bob King - present

5. Presentations
   A. Stephen Palmquist – Gabriel, Roeder, Smith & Co. – Annual Actuarial Report
      Mr. Palmquist reviewed the Actuarial Report and answered questions posed by the Board. He noted that markets were extraordinarily depressed a year ago so he anticipated a -20% return, but March and December Markets shot up, resulting in a return of 2%. He also added that the reduction of the rate of return from 8% to 7.5% and the salary estimate from 6.5% to 6% has also had a positive effect on returns.

      Employer contributions increased by 1.83% which breaks down to a 1% increase for the City (24.23%) and a 5% increase to BSO (22.79%, which includes employee contributions paid by BSO). This increase resulted from changes that were made to the Plan; otherwise, the percentage would have decreased (pg. 4).

      Mr. Palmquist pointed out that there has been very little change with regard to participant data. Mr. Schinder asked why annual benefit amounts would decrease if the number of employees is the same and Mr. Palmquist replied that he would check into it. The total Employer normal cost is $715,058 or 14.76% of covered payroll.

      When the actual Plan experience differs from the actuarial assumptions, an actuarial gain or loss will result. Fund earnings and salary increase assumptions have a considerable impact on the cost of the Plan so it is important that they are in line with the actual experience. For this reason, it was important for the Board to reduce the salary increase rate to 6.0% which is now equal to the average actual salary increases. Fewer actual retirements and terminations than the assumption have also resulted in an actuarial gain.

      In reviewing the Revenues and Expenditures, Mr. Palmquist advised the Board that investment income for FY08-09 is $245,326, compared to -$2,012,415 in FY07-08. The expense ratio for the Plan is also very low compared to other pension plans. Mr. Palmquist spent some time explaining the differences between “old” and “new” methods for the development of the actuarial value of assets. The new method satisfies the requirements of actuarial practices.
The Plan's investment rate of return is 8.0% over the past 29 years. For the past 5 years, the average compounded rate of return is 3.4%. Mr. Palmquist advised that the Plan is well-positioned to increase the funded ratio. A discussion followed about average funded ratios for other Plans and increases in benefits which have resulted in increased liabilities during the last 10 years.

Mr. Palmquist summarized his review by emphasizing that the City's cost has increased as a result of strengthening the Actuarial Assumption. This cost increase is quite moderate compared to the increases that other plans are experiencing.

The minutes were unanimously approved as submitted by the Recording Secretary.

Horacio Montes de Oca
Mr. Montes de Oca reported on the performance for the month.

Portfolio Composition

<table>
<thead>
<tr>
