LIGHTNING PREDICTION SYSTEM POLICY
The ThorGuard Lightning Prediction System has been installed to provide protection from lightning disasters for the public. When the ThorGuard warning systems sounds a 15-second horn blast, the outdoor facility and sports fields must be cleared of all patrons as soon as possible. All persons must seek shelter and remain inside a building or vehicle. During this period, a strobe light on top of the building will light up, indicating the warning, and will continue to operate until the weather clears. The “all clear” signal will sound 3 short horn blasts, at which time patrons can resume activities.
